1 minute timing goal _____

Number of problems correct _____

Dear Parents,

This year the first grade students are going to be spending time daily practicing and learning the math facts, beginning in the operation of addition. Our class will keep working on these facts until everyone knows all the facts in this operation instantly, without any pause before answering. We will be using a program called Mastering Math Facts. It will take only a few minutes each day of class time, but students will keep working until they have mastered all the facts. A fact is mastered when it can be answered instantly, without any pause. Mastering Math Facts is unique because it teaches only 2 facts and their inverses on each page. The program allows each child to go at his or her own pace, taking as many days to master those two facts as needed. Students are given an opportunity daily to show they have learned a set of facts by passing its test. Once students "pass" a set of facts, they color in the letter for that set on their "Rocket Chart."

You can help your child progress and learn faster by practicing at home the same set of facts your child is learning at school. We have sent home the complete set of math facts. We will let you know weekly which set your child should be practicing. Please do not have your child go ahead of where they are in school. It will cause unneeded frustration. Each student will begin with Set A next week.

Here's how we recommend you practice. Your child should have the top half of the practice sheet (without answers written in) in front of himself or herself. Have your child read each fact aloud and then say the answers to you. If you hear either the slightest hesitation or an error on one of those facts, give your child some extra practice on that fact. The best way to give extra practice is to begin by immediately giving your child the correct answer, then ask him or her to repeat the problem and the answer once more. Next, back up three problems and have your child begin again. If there is no hesitation or mistake when the problem is reached this time, be sure to praise your child and let him or her continue.

Work until finishing the top half of the page, but no more than five minutes in one session. If you wish to do a second session, wait at least an hour, or try it again in the morning. When memorizing facts, two short sessions hours apart are far more helpful than one long session. Your child's hard work should pay off in "passing" within a very few days. Then the next set will be assigned and practice can begin again. Each practice and test sheet is cumulative, including all the facts learned so far.

Learning all the facts in a given operation is a lot of work, but future success in math is dependent upon knowing facts so well that the answers come automatically without much thinking. Especially in a world of calculators, being able to compute math facts mentally is needed just to know if the calculator answer is correct. You can also help by sharing with your child the importance of learning math facts. Thank you so much for your support of this critical learning goal. I will keep you notified of your child's success in this important task.

Sincerely,
The First Grade Teachers
